NEW ICEBERG LETTUCE INTRODUCTIONS

Arrecife

- Vanguard type lettuce best suited to harvest from July until end of October
- Large framed vigorous lettuce that produces good sized heads
- Leaves have a strong texture with very good disease resistance
- DMR 1, 3-18, 20-22, 25.

Asdrubal

- Early winter iceberg best suited to harvest from mid April to June
- Stand out feature of Asdrubal in 2008 trials was the quality and uniformity of the head.
- Crisp dark green colour with a medium-large frame size
- DMR 1-16,19,21 and 23.

* Asdrubal and Arrecife are non Nas-Resistant varieties. Pre transplant treatment with Confidor is recommended.
